Technologies (Facter)

An Introduction to Facter

03-4101

Facter

Cross-platform system profiler Gathers basic node information

- hardware
- operating system

Facter

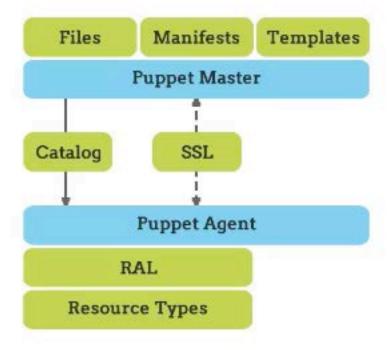

ARCHITECTURE

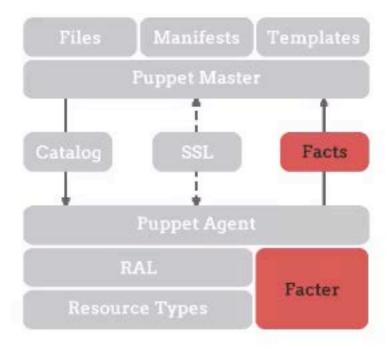

ARCHITECTURE

PAIRS

key => value

```
architecture => x86_64
ipaddress => 172.16.10.1
kernel => Linux
operatingsystem => Ubuntu
```

PAIRS

key => value

```
architecture => x86_64
ipaddress => 172.16.10.1
kernel => Linux
operatingsystem => Ubuntu
```

Key-value pairs are called facts.

TOP SCOPE VARIABLES

```
$<fact name>
```

```
$architecture
$ipaddress
```

```
${::architecture}
${::ipaddress}
```

CUSTOM FACTS

hardware_platform.rb

```
Facter.add("hardware_platform") do
    setcode do
    Facter::Util::Resolution.exec('/bin/uname -i')
    end
end
```

EXTERNAL FACTS

```
Fact Location:
```

```
Puppet
/etc/facter/facts.d/
```

```
Puppet Enterprise
/etc/puppetlab/facter/facts.d/
```

```
# my_external_facts.txt
key1=value1
key2=value2
key3=value3
```
